

Omnia xs^{basic}

Pure and ultrapure water systems.
Extra slim. Practical.
Compact.

**For demanding applications
in the smallest of spaces.**

In life sciences and labs.

stakpure

H₂O – WATER IN ITS PUREST FORM

H₂O pure. Pure and ultrapure water from the super slim Omnia xs compact system with intuitive *basic* dispenser.

Work space in laboratories must be used efficiently. The Omnia xs system frees up space on the lab bench and makes work more efficient.

Despite the extremely compact design in xs format, the system works in a resource-saving and completely autonomous way. Accessories such as a leakage sensor, pressure reducer, and pre-treatment cartridges are already integrated in the compact housing. This saves space in the laboratory and also ensures exceptional operational and occupational safety.

Reliable. Reproducible. The quality of the ultrapure water is what counts. Consistently high water quality is crucial for the reproducibility of the analysis results.

Constant, highest quality standard. Even in ultrapure water systems stagnant water can lead to the formation of biofilm. That is why our Omnia series has a recirculation function that prevents the growth.

Super flat dispenser arm.

Autonomous specialist with integrated pre-treatment and ultrapure water cartridge. Simple cartridge change in seconds.

Equipped with OneHandOperation-Dispenser *basic* – removable, rotatable and swiveling with flexible connection for convenient water withdrawal.

OmniaPure *xs^{basic}*

The specialist.

For H₂O pure type I.

When your need is for highest quality pure water that fulfils the demands of analytical and life science laboratory requirements, then one of these OmniaPure systems will be the right choice for you. The incorporated pre-treatment constantly ensures the reliability of your experimental results and reduces running costs.

Features

- OptiFill^{basic} dispenser is standard
- Simple and economical filter change
- Leakage sensor is standard
- Integrated pressure reducer is standard
- Very space saving
- Ready-to-use, including filter cartridges

One hand operation

Easy water dispensing

Fits neatly on the wall

Surface-efficient – so narrow that it almost fits on an A4 sheet ...

OmniaTap *xs^{basic}*

The Allrounder.

For H₂O pure types I + II.

OmniaTap *xs^{basic}* is the ideal system when both pure water and ultrapure water are required, but in relatively small amounts. The ability to provide both types from a single system results from the combination of ultramodern purification technologies. These also make it possible to connect the system directly to tap water. A press on the dispenser button activates dispensing of ultrapure water type I via the digital dispenser control. The adaptable pure water tanks with a volume of 7, 30 or 60 liters enable the continuous withdrawal of type II laboratory water for other applications.

Features

- OptiFill *basic* dispenser is standard
- Simple and economical filter change
- Leakage sensor is standard
- Ready-to-use, including filter cartridges

One hand operation

Easy water dispensing

Fits neatly on the wall

Tank options

7-liter docking tank

Can be mounted directly on the appliance, space-saving and efficient.

30-liter tank

Flexible installation – on the laboratory bench or under-bench in the laboratory cabinet, with or without base.

60-liter tank

Ideal for larger quantities of water – also suitable for under table installation* without a base.

* Installation height with tank ventilation filter 80 cm

* Feed water with high conductivity can reduce the service life of the cartridges and increase the conductivity of type III water.
If the conductivity is between 800 and 2000 µS/cm, we recommend using a water softener

** With an SDI/FI between 3 and 5, pre-treatment must be used
