

SC5000a Recirculating Cooler

The SemiChill series offers powerful recirculating coolers. These units have been especially designed for applications in the semiconductor industry. Five models are available, with cooling capacities from 2.5 to 10 kW (air- or water-cooled). Working temperature ranges from +5 to +35 $^{\circ}$ C which can optionally be extended from -20 to +130 $^{\circ}$ C.

Also available is a selection of powerful pumps. The units can be modified to provide heater capacities up to 5 kW. Selection between different electronic modules to conform to simple or high demands such as, for example flow rate and conductivity measurement, external temperature control or integration of the coolers via analogue signals, RS232, devicenet or ethernet. A large range of accessories and options including DI filters, microfilters, USB adapters, etc. is available.

Your advantages

- For the most demanding applications
- · No side vents, instruments can be placed right next to other equipment
- · Handles and castor make relocation easy
- · Industrial grade mains power switch and emergency cut-off
- Pressure Indicator
- Front filling port
- · Low noise level
- · Precise PID temperature control
- ATC3 3-Point-Calibration
- · Warning and safety functions
- · Modular design allows selection between different options

All Benefits

100 % Cooling capacity

'Active Cooling Control' for cooling available throughout the entire working temperature range, fast cool-down even at higher temperatures

Intelligent temperature control.

Intelligent cascade control - automatic and self-optimizing adaptation of the PID control parameters with external stability of +/- 0.05 °C.

Process. Under control.

Full regulation of the dynamics control, access to all important control parameters for individual process optimization.

For higher demands

PID Temperature control with drift compensation and adjustable parameters, improved temperature stability for external applications, temperature stability ± 0.01 °C internal, $<\pm 0.1$ °C external.

Control from the external application

External Pt100 sensor connection for precise measurement and control directly in the external application

ATC3. Calibration.

'Absolute Temperature Calibration' for compensating a physically caused temperature difference, 3-point calibration.

Early warning system for high/low temperature limits

Maximum safety for applications, optical and audible alarm, convertible to automated cut-off function.

Connection of additional equipment

Stakei connections for solenoid valve, HSP booster pump and HST booster heater

For flammable bath fluid

Classification III (FL) according to DIN 12876-1

Precise

PID Temperature control with set control parameters, temperature stability ±0.02...±0.2 °C

Services 24/7.

Around the clock availability. You can find suitable accessories, data sheets, manuals, case studies, and more at www.julabo.com.

Quick start.

Individual JULABO consultation and comprehensive manuals at your disposal.

100% Checked.

100% testing. 100% quality. Each JULABO Circulator undergoes thorough quality testing before leaving the factory.

Satisfied customers.

11 subsidiaries and more than 100 partners worldwide guarantee fast and qualified JULABO support.

Green technology.

Development consistently applied environmentally friendly materials and technologies.

JULABO. Quality.

Highest standards of quality for a long product

Clever pump system

Reliable and consistent pump capacity, electronically adjustable pump stages
